

## **DIGITAL INDIA**

Unity we stand, togetherness is what to be connected and to connect India and its citizens to themselves and to the wide world. India's Prime Minister Narendra Modi launched a campaign on 1st July 2015 at Sanjay Gandhi Stadium with a motto of 'Power to Empower'. This campaign is under the 'Ministry of Electronics and Information Technology' and is led by Ravi Shankar Prasad and S.S Ahluwalia.

With motives such as delivering government services digitally, universal digital literacy, and development of secure and stable digital infrastructure, campaigns targets to make Digital India- The pillar of India. Various ongoing activities like MyGov.in and BBNL acts as a helping hand to the policy.

Pertaining to the current Covid-19 scenario, digital India is the most active campaign. Due to various floods and developments, deforestation is reaching its maximal day by day and to put a stop to these hazardous calamities and to save Mother Earth, non-usability of paper will help to nurture earth by 1%.

Lets dream of a digital India where farmers are empowered with real time information to be connected with global market. India is dealing with crisis in such a way that we can hold our head high. As Prime Minister Narendra Modi said 'Technology has a critical role in realizing the vision of a digital India - The power of 125 crore connected Indians'.

Digital revolution is just starting so let us all hold a hand and connect rural areas with high speed internet connectivity and increase digital literacy.
