

Jai Hind!

The life as a cadet is one of the best experiences one can ever have as it teaches them life as it is, and shows how it is to be an officer in the Indian Armed forces. I feel so lucky to be a part of this organization. My journey started in ~~the~~ August 2019 when I took part in the NCC rally and luckily cleared the rally. I was enrolled in 64 UP BN after passing the written exam. NCC has actually groomed into a discipline individual through various activities, be it waking up early in the morning and reporting in the battalion or preparing ~~my~~ ourselves for any task. It has actually made me punctual and active. The first achievement of ~~me~~ in NCC was the day when I was standing in the Parade Ground in NCC uniform or "vardi" ~~it~~ for the first. No doubt every single cadet was feeling like an officer at that time. I was present in every single parade and in every programmes. I learnt the ~~real~~ true meaning of friendship, when you ~~have~~ ~~become~~ hold each other's hand and support each other in place of running away. We share our refreshments, lunches and even our problems. ~~By~~ with ~~our~~ seniors ~~are~~ family. During my guards which was actually the best 10 days of ~~me~~ ~~to~~ of NCC till now, where we use to get punished together but still our energy level would remain the same. ~~It~~ has developed the feeling of co-operation within me. There were a lot of changes inside me in the past one-year after joining NCC ~~and~~ which will definitely help me in becoming a true leader. One of those things is social adaptability because number of cadets come from different kinds of societies, it teaches you not to adapt

in an alien environment but also teaches how you can reach people & lead them. Trust me in NCC you'll create a number of memories. I to be took part in cyclothon where we cycled for 4 for kilometers but still the distance seems to be very less when you are with your buddies. ~~The~~ We all are equal in front of our seniors and that is the prettiest thing when either a boy or a girl (ie. SO and SW) ~~has~~ to can be asked to do push-ups and run ~~over~~ around the ground (if you're late). We made several vides in this pandemic so that we could aware each and everyone about the seriousness of this virus. We have get the certificate after completing the COVID-19 training. Being an NCC cadet and also a youth, it is our responsibility to be a helping hand for the government and that's what NCC has taught me that how can one contribute in the building of nation. In past one year, I to have become more responsible, patient and serious for my carrier. # You will find everything in NCC but for that you have to do hard work and should have curiosity to know and do.
