CAMP EXPERIENCE

I attended my first camp on 19th JUNE 2018. When I was in 9th grade. The first thing we did at the camp area was registering of our details, they allotted us with our respective tents, we segregated all our things there and went to have food. After that we had our theory classes and then attended our PT Class. We had YOGA DAY CELEBRATIONS, the day before we practiced whole heartedly and gave our best. After that day we had firing classes for the next two days, it was so exciting. After which we had cultural, we participated in all the events and secured first position in dance, throw ball, running and singing. The food prepared on the last was so tasty.. this was my first camp experience...

My 2nd camp started on 31st December 2018, we had a cake cutting on 1st January on the occasion of new year, we had so much fun, dancing and singing together, we didn't sleep till next morning 5am, it was same as the first camp.

I went for RDC camp selection and were I got selected for most of the work in this camp was at night as we had many programs, cultural events and so on. We also had drill practice. This camp was held in September and it was my last camp, the best camp until now.

Such camps and experiences develop one's personality and open the students' minds and make them bolder, smarter, confident and much more patriotic. Firstly they get a chance to explore themselves and their hidden talent. The camp was held a year ago but memory still lingers in my heart. All I would like to say about the camp was that it was an "unforgettable memory."

--Jai Hind.--
