

PATRIOTISM

Patriotism consists not in waving flag, but in striving that our country shall be righteous as well as strong.

Patriotism refers to the passionate love one has for his country. This virtue pushes the citizens of a country to work for their country selflessly and make it better. In other words patriotism means keeping the country's interest first and then thinking about oneself.

Usually, we refer to our country as our motherland. This further proves that we must have the same love for our country as we have for our mother. After all, our country is no less than our mother; it nurtures us & helps us grow. Everyone must possess the virtue of patriotism as it makes it better.

In addition, it also enhances the life quality of the citizens. It does that by making people work for the collective interest of the country. When everyone works for the betterment of the country, there would be no conflict of interest. Thus, a happier environment will prevail.

In short, patriotism does have a great importance in developing the country. It eliminates any selfish & harmful motives which in turn lessens corruption.
