

Experience

On 5th April I went to my unit 1 Bengal CTR for training and there for the first time in my life I grabbed a rifle and learn how to fired. It was a .22 mm deluxe rifle which is used for shooting in Ncc weapons training. On that day I knew a lot more about this rifle, for example weight of the rifle is 3kg approx it's overall length is 1092mm it's magazine capacity is 10 rounds. I also got to know about its different body parts and their functions. Although the rifle was empty. Still, I am very happy to fulfil this desire among other desire of my life. I will remembered this day of my first ever rifle holding forever. Many many thanks to NCC for making it possible for me to fulfill this wish.
