

Clean India Green India is an initiative under the Swachh Bharat Abhiyan launched by the Hon'ble Prime Minister of India in 2014. Most of the people in India throw their garbage out of their houses and think that if we've cleaned our homes then we've completed our duty and now it's the turn of the sweeper to clean it from outside. But it's not right. Everyone should know their duties that each one of us is responsible for this untidiness and dirtiness in India. People keep on saying, "This country is so dirty. Everywhere is dirt; on roads, out of homes, etc." But we should also think that it's only we who have thrown this dirt. Our Hon'ble Prime Minister Mr. Narendra Modi has started a movement named Swachh Bharat Abhiyan. In this movement, he himself has held a broom and taught a lesson to every Indian that it doesn't matter what's your caste or status or what you are, if a PM himself can clean the streets then why can't common people do this. He also says that it's everyone who has to be a helping hand to make India clean. He has also introduced some garbage vans of blue and green colored bins for the segregation of garbage. People should use them correctly as the green one is for biodegradable waste such as wet waste and vegetable peels and the blue one is for non-biodegradable waste such as plastic wrappers. We should make proper use of these dustbins.

ADVANTAGES

1. It reduces air pollution and leads to a cleaner and purer air. In addition to minimizing Global Warming, it also increases the content of oxygen in the environment. The Clean India Movement is launched by the government employed. The government began sanctioning loans to support the purpose of building toilets.
2. The benefit of green cleaning is the improved health and safety of both humans and the surrounding environment. Green cleaning can also be more efficient and can offer cost savings as the quantities of chemicals required in the cleaning process are generally reduced.
3. Tourism and Swachh Bharat. India is a land of cultural heritage and rich history.
4. Health Unhygienic conditions is one of the major root cause of diseases / illness.
5. Clean Technology.
6. Individual Productivity.
7. Foreign Direct Investment (FDI)

DISADVANTAGES

1. Needs a lot of support = Only a handful of people cannot bring about a change on their own.
2. Improbability of sustained effort = There is a lack of sustained effort from the government's side.

CONCLUSION

The main mission of clean India Green India is to stop the deforestation and increase the number of trees in India to decrease the pollution as the trees help in reducing the

pollution. This mission was launched in the way between the two government programs the Swachh Bharat Abhiyan and the digital India.

“Cleanliness is the only way to keep all the diseases away”
