

## **My NCC Experience**

**I am Rameeza M, I am here to share my experience as an NCC cadet. I joined NCC as a cadet in 2020 during the pandemic 'Corona'. I joined NCC with many expectations. I really wanted to wear the NCC uniform and be in the ground and do other activities along with other cadets but unfortunately the pandemic has put everything down.**

**Even though we have never been given a chance to practice drill and do other activities in college, our teacher and our seniors has been helping and guiding us to be well disciplined and trained cadets through online classes and video lessons but we still we miss 'Being together'.**

**Being one among the National Cadet Corps has been bringing changes in my behaviour. I am being more punctual and disciplined and also has started being more socially active. By the end of three years college life I also want to leave as Well disciplined NCC cadet. I hope we soon become free from the pandemic and I get chance to be in the ground wearing my NCC uniform because that is the thing I miss the most being an NCC cadet.**
