### **NCC – TRAINING – EXPERIENCE**

**What is NCC ?** NCC (National Cadet Corps) is an governmental organization where the students of schools and colleges joins on **volunteer basis** and get trained. NCC plays a great part in shaping the youth of the nation as a dedicated, disciplined, good leaders and citizens to the nation.

**What are the trainings in NCC ?** There are several training in NCC under institutional and various camps like NIC, RDC, TSC, EBSB, YEP , Adventures, Sports camps and more. The training activities includes **basic military trainings** like drills, weapon training, map reading,

obstacles training and **self developments, social skills, leadership skills.**

**Some of my training experience !** At first, the trainings I undergone like drills, physical parade and classes for self development, life lessons and leadership took me physically and mentally lot of steps ahead and taught me how to shape my life and career well.

Next , We have done several activities and conducted some webinar on National and International days by which we created awareness among the people. For planning these kind of activities , initially we learned about those days and why those days were created by that we came to know lots of social issues and ways to solve them together with others.

We were also participated in various government initiative activities like Swachh Bharat, Swachhata Pakhwada, Fit India by which we learned to be fit and how important it is and also we had opportunities to

learn and contribute our service to nation by keeping our surroundings clean.

We were also trained directly by military personnels in camps which was a great experience to learn from them.

All of my trainings and activities did in NCC was always by uniting with other cadets of my batch which always remains me the motto of NCC “**Unity and Discipline**” and its importance cause togetherness achieves a lot .
