

## ARTICLE ON MY EXPERIENCE AS A NCC CADET.

We are the ncc cadets, have a very adventurous experience during our ncc academic years just like during the "B" - certificate and "C" - certificate.

Actually we have participated in various types of activities during the ncc academic years. we have learnt a huge amount of information regarding, society, history, social welfare, etc.

And we are very at the time of parade i.e; our physical drill practice. we enjoy alot

during the parades of our ncc. coming to our classes, we have learnt different kinds of subjects regarding the society subjects and our defence wings subjects.

we enjoy a lot during the theoretical classes as well as during the physical drills

known as the parade. our experience is

a very enthusiastic experience, where only few people can get it.

we so enthusiastic about our camps. Because we learnt a huge amount of things in the camps. we can participate in different kinds of camps during the academic year of our ncc. even we can participate in the national and international camps which is a wonderful opportunity to us. more over ncc defines in "unity and discipline". we have learnt many morals and ethics during our classes and on field training. NCC is a opportunity where we can participate in different kinds of defence academy activities. The experience of being a ncc cadet (obe) is a tremendous and wonderful experience. So, this is all about the experience of being a ncc cadet from my sight of vision.
