

My Experience at CATC Camp

I would like to share my experience at CATC Camp. On the first day of camp, I was very nervous and tensed because due to camp my complete routine had changed but later on when I reached at the unit and met other cadets then I felt good because I've got a great opportunity where I can experience a life like an army person.

During camp, our day starts with a healthy and delicious breakfast then we get collected in the ground for official reporting. After that our drill training gets start in which we learnt discipline, unity and co-ordination among all the people.

Apart from drill practise we also have weapon training class in which we learn basics of weapons and also got opportunity to hold rifles and the feeling at that moment was very proud.

Date: _____

Then, we also have theory classes in which we learnt about map reading, field craft, battle craft and medical knowledge.

At the camp, the main thing was that we learnt unity and discipline because all the cadets from different caste, places have lunch, breakfast together.

On the second last day of the camp there was a drill competition among different colleges for which we've practised very hard and finally we got result of our hardwork and secured 2nd position.

Overall I would like to say that I will remember this camp forever because I learnt many things at the camp.
