

'BE A PART OF THE SOLUTION NOT A PART OF THE POLLUTION'

River pollution can pose a serious threat to both the environment and the human health. Continuous river pollution can disrupt the ecological balance and lead to the loss of biodiversity. River pollution is thus a critical problem .

On 28th March, 2022, there was an organisation UNPLASTIC MAHANANDA CLEANATION with Mr Erik Solheim: The Sixth UN Environment Executive Director and Under-Secretary-General of the United Nations.

There were, NCC cadets from 16BN battalion, many soldiers and few NGOs taking initiative as responsible citizens.

This drive not only encouraged us to keep our mother earth clean and safe but also this brought all of together.

“Aao Hum sab chale,
Mahananda safai karne”

This was said by Mr Erik Solheim who was leading the entire program, it was very nice of him that he took such a big initiative for our mother land, which is a huge thing.

We reached there at sharp 10am after reaching we registered ourself in the program process which was compalsary .

They gave us 10+ black polithin and few gloves after that we divided into small groups and started Cleaning the area.

May be this is a small thing for others but it's a big deal for me as I feel, I took one step close towards building a responsible cdt Sakshi kepchaki.

After cleaning the area Mr Erik came to us he appreciated our work and spoke few strong lines which inspired us and gave a light of knowledge.

If the waste can't be reduce ,reuse ,repaired , rebuild ,resold , recycle or composed ,then it should be restricted or removed from our daily used product.

In the conclusion I just want to say that it's on our hand how we want to picture or build our earth for our future generations , lets not change the earth but let's change our mind towards our earth because our earth is beautiful but not our mind.
