

Education Should Be Free

Education can be an effective weapon for the people. But nowadays it is mostly for governed by corruption. To improve the development of a country. All the citizens of that country should be educated. Still in many circumstances they are not able to achieve it due to financial different if education is made free then the country will start developing the country. Which will lead the country in the right direction. Education should be accessible to everyone because an educated citizen acts as a more productive citizen. Nearly every country in the developing education to its citizens you can also find more sport Technology and may more education become crucial for anyone to survive their academic social and political career. Education worldwide require a lot of money but it should not be monopolized so that the entire globe can move at same peace solving problems like world poverty or world starvation. Otherwise the world's future will inevitably go nowhere, unable to make its talent any harder at least with more knowledge you stand a chance against the crowd and easily face significant Obstacles in the world today.
