

NATIONAL CADET CORPS

PERSONAL EXPERIENCE AS NCC CADET

Jai hind everyone, my name is LCPL Amit Rawat. My personal motivation to join NCC was the awesome sight of many Republic Day parades, independence Day parades and the inspiring uniform of NCC. NCC is National cadet corps is a tri-services organisation comprising the Army, Navy and Air Force.

I would like to share some of the experiences that I had in NCC. When it was first I felt scared and shy because I didn't know anything about it. But then slowly I learned about it and so many things which otherwise I won't get a chance to in life . NCC was the turning point in my life. It changed me from a common person. It changed my quality of leadership, time management, team work, honesty, selfishness, and discipline. There are more things I'm learning from it. From the college itself I have experienced a lot of things like basic training arms, drill and other activities . It taught me to be unique, hard working, dedicated and most of all an achiever . It taught me to be unique , hard working, dedicated and most of all achieve it and inculcate the attitude of never give up, make us optimistic and build a lot of self-confidence. NCC also motivates cadets to perform to their best by offering scholarships, cash awards, prizes and medals and trophies.

The NCC, is one of the premier youth organisations in our country, contributing in propagation of national unity and integrity amongst youth. It helps us into dynamic and responsible citizens of our country. Other than the military training we the cadets also learn several valuable things such as selflessness, honest way to build confidence and gain leadership.

Anyone who joins NCC always leaves with a bucket full of new ideas, the courage to carry them out and most of it giving them the dedication to persevere through failure as well.
