

AGRICULTURE

IN INDIA

"If conservation of natural resources goes wrong, nothing else will go right."

- M.S. Swaminathan

Agriculture is the backbone of our country. It acts as a major source of income in many countries along with India. More than 50% of India's population is dependent on agriculture.

Agriculture has contributed a lot to the Indian economy and has proved to be the main source of livelihood for people. However, there are still many farmers in India who are not able to use the modern technologies to enhance their products and yield; this is because they don't have enough means to incorporate the advanced equipment.

Regiment No -

WB 21 SDA 152606

Rank - Cadet

Name - CDT Sukanta Das

College - DB College.
