

Jai hind, I am cadet Savita Narayan Marathi. from 1 Karnataka Artillery battery NCC Mysore.. NCC is absolutely useful, here you will get some memorable camp experience revolution's about how our armed forces are working. NCC cadets become skilled to take self importance in them and the specialised training also powers thespirit of being a real Indian. This motivates them towards joining the armed militaryforces and providing their 100% when the nation needs them. National cadet corps is one of the leading youth organization in our country, contributed in spreading national harmony and reliability amongst youth.

There are many firing ranges in our directorate. Cadets from each year are allowed to participate in range firing. In order to reach the firing range we have to report to the unit in pre-scheduled time and from there our journey begins for the range. After travelling for half hours by our unit's truck we reached there. After that we all have to clean the range and arrange everything to make it comfortable for firing. This cleaning is followed by our warm up. In warm up we have to do push ups , frog jumps, running etc and we have to do these till we perspire as much as it can turn our uniforms colour darker. I learnt discipline and unity being a NCC cadet. I am so proud to be a part of NCC.
