

NCC DAY AT SEA

I am NC1 MEEVAL MARIAM JISSAN from 7(K) Naval Unit NCC. On 21 /11/2022 , the unit organised NCC DAY AT SEA for all the three wings of NCC and I got the privilege to attend the course. All the cadets gathered at INS Venduruthy (Naval Base at Kochi) and from there we were taken to the south jetty .All the SD's entered INS Tir (A86, is cadet's training ship) and SW's in INS Sujata (P56, is a Sukanya class patrol).

The event started by hoisting the national flag at 0800hrs .They showed us a video which breifs about Indian Navy . We got a entirely different view of shore from the ship and was fascinated by the glory of the sea.The instructors gave basic details about different parts of the ship and took us to various departments in the ship which are concerned with specific work. A Demo of RAS (Replenishment at Sea) which is the exchange of men and material between two ship at sea was shown . The Halo operation where a diver comes to rescue a person from the sea while hanging to the helicopter. That was an adventurous act. A chance for Firing and a ride on the boat was also given to some cadets. The experience in the ship was incredible. Inside the ship all the facilities are limited and congested , this shows us the struggle of the soldiers who have to go through this for safeguarding their nation. I was greatly inspired by their dedication and motivated me to join the Indian Navy in my future.
