

Article Topic -> Religion the Ancient Science

I was always excited to once write article on this topic and with my good fortune i got the chance to write about this topic in this camp so jus get into the topic without any delay. Religion is not just about worshipping the god and being spiritual instead it's something more deep more deep than anyone thinks. We came to know about Religion god and etc from stories said by our adults and from ancient scripture such as: Bhagwat Gita, Quran, Bible, etc. when we started to explore them we didn't extract it as the way it was to be we took them as stories and epic, But we never saw it with a different perspective and never did harness their extract. To make you believe let me give you some example but before that i want to make it clear that this is not to hurt anyones beliefs. One great example is in hanuman chalisa, ~~in~~ one line of hanuma chalisa is "Yug sahastra yojan far bhanu, lilya thaki madhur phal jano" focusing on the first line of this syntax we see that it says Yug which is the span of years in Hindi, sahastra span of distance and yojan the span of distance when multiplied all together we get the exact distance from earth to sun as said mentioning bhanu as sun. This was a very great thing which was hidden in the hanuman chalisa that many of us ~~had~~ chant every day. As the same there are many many things hidden in our ancient scriptures that if mentioned this article is very small for my purpose. For writing this article is to bring awareness around the globe that our ancient ancestor were far more advanced

Then we are today and so instead of discovering and being advance by ourselves. we must find out and extract the secrets hidden in our all religion making you sure the day we start doing this we will be united and once we are united no one can stop us its progress in our dechnology. at last i chose this topic as it is very interesting and it thought deeply is the great gift for humanity that is affordable by every human. And as always remember we must ~~be~~ be dedicated towards our duties and whatever happiness we must avoid our own necessities and greeds must be dedicated towards mankind.

"The power lies in being united and
Is true forever and for whatever happens
In this whole world"

- Thank you.
