TODAY'S KIDS LIFE.

India is a large democratic country. But the India is not developed well in anything except population. In today's life of kids parents are giving so much pressure to kids even they can't concentrate on studies because of heavy pressure. In India almost all are educated but parents don't have knowledge to understand kids mind set. In today's society kids are not having rights to decide what they want & fill they have so much of confusions ^{Due to} so much of stress. Parents tell them to come first in class for the parents sake. If they are besties it break down the friendship because of ranking in class. Besties into enemy. They break down the self confidence of kids by heavy pressure. So the kids should face so many situations like this. We have to take to this in front of society that all should understand the problems of kids. Kids are facing heavy problems. We the kids have to get free from this stress, pressure, clarity, etc. Parents have to understand this. By this I conclude. You should understand kids problems.

Support their aims and try to understand their
happiness. So, that few more golden brains
can be donated to nation in the
name of Kidge.
