

NCC Day at sea was such a memorable day in my life that I'll never forget. We 17 cadets from our college along with seniors reported early in the morning at naval base. We were really excited know how the day would be.

Minutes later we were taken into the navel base port where we directly stepped into INS SUJATA, she made our dream come true through the maiden voyage, at first all of us were provided with life jackets to ensure our safety. After providing us with breakfast, we were taken onto the deck to show the departure, and then we were shown how does the transfer of men and materials take place between two ships in the sea. Rescue

operations are also exhibited, were a person jumped from a helicopter to the sea with safety measure's attached.

Firing from the ship was practically explained.

We were delighted to see dolphins diving and flying fish. Food was served onboard in the ship, which was so tasty.

All the officer's were polite and explained all our doubts and made us comfortable all through the journey. The day was concluded by the evening, and we captured some of the moments to cherish forever. It was a rare opportunity that NCC gave us.
