### Modern education in covid pandemic

In the earlier days we interacted with teachers and had fun in learning. But in pandemic years we used only mobile devices for classes & had no physical fitness. We sat inside the four corners of our house and just listened to our teachers. We missed our friend and the fun that we used to have in offline classes. We also got addicted to social media during online class. We even missed our family, cousins & were not able to celebrate festivals. And also so many people lost their jobs. We missed our NCC parades during this pandemic.
