Friends

Friends are part of our life. I did know ~~any~~ think about friendship. When I was leaving with them I have been teasing them, when I was with them I always telling them you're my heretofore, you're my enemy don't leave ~~with~~ me ~~but~~... when I went for my camp I was early missing them in fact I not missing family I am but I am missing my friends more than my family & it's early hard to ~~be~~ not being with them. Very single moment I can remember with ^{being} them. And when I was teasing them, when I was playing with them & eating with them etc... I am reliving these values now. I think I am more ~~At~~ age with them. Last of my essay I should Thank them to being with ~~them~~ me I wish that my entire life they should be with me like this only.
