NATURE

The basic needs that every creature in the world gets is from nature. There is 96% of water in the world and others 4% is land. World is full of nature, from the water we drink, land we live to the air we breathe.

If we talk more about nature, it is the natural resources which means the resources we get from nature like gold, diamond etc which are very precious now a days. As we the humans ~~live~~ use natural resources, animals, birds use natural things

As conclusion, we can tell that there is no survival without nature. Each and every creature in the world use natural things.
