

Today, the day at sea gifts me overall an awesome experience. We reached sharply at 6 am in the Vembanad gate and mustered at ~~6:10 am~~ 6:10 am. We went to the shipping ceta via a bus and there are cadets from three wings. That is Army, Airforce and Navy. We get into the ship and INS Sujatha by passing two ships INS Investigator and INS Tir. And we mustered inside the ship. ~~Then we put our luggage in a room~~ We assigned into group of 10 and I am in delta group. Then we put our luggage in a room and the officers enquired us whether we ate breakfast or not? After seeing a video of naval ships, purposes etc. Then I get to know that navy is 3 dimensional which is the main difference of navy from other wings. After the breakfast, the ship started sailing about 9:30 hrs and I really love it. I get to see the dolphins, flying fish, Jelly fish in the sea which is very new to me. After a 1 1/2 hrs of sailing, we get some snacks from ship. Eng. Our group get to see ^{OP-3} navigation room, radar room etc by our instructors. I get to see the man landing from the helicopter, which is very professional and it admires me. Cargo passing and man passing is illustrated lively in front of us in between INS Tir and INS Sujatha which is the iconic moment of the visit. and then firing is done and after that we ate lunch which is absolutely amazing. Then we settled in the classroom due to the afternoon sleepiness. One cadet from

5-1. These sang a song, that is also great and next
we played Anthakhasi in the ship. I also participated.

Then we return into the shore by 3:30 hrs and Tir
is already there. After many photos taken with our Instructors
and other officers. After that we get off from there, thus our
sailing came to a sweet end.
