

WHY I JOINED NCC

I joined NCC because it was my wish from when I was studying secondary education to join. But I didn't get that much time to spend my time training myself. But I get an opportunity to join ncc and train here. And also it helps to build me to prepare myself for the civil service exam. Another reason for joining NCC is my father was a military man before so he always motivates me to do everything myself and also he tries to make me fit in physically and mentally strong so NCC would help me to reach my and my father's goals. It will also help to develop a good personality and discipline in myself. And also help to increase my rank or marks in upsc results. It teaches me how responsible we are to our society. This will also help us to know about a good camping experience and also knowledge. Through this I can make myself do any good thing without fear. This will give me more confidence. It will help us to do good things without any fear. JAIHIND
